SATAmijet® 3000 B HVLP mini art

For custom paint work

The SATAmijet 3000 B HVLP mini art is designed to ensure perfect finishes in various fields of application. The 1.2 SR is perfect for custom paint works, smart repair, blending and hobbyists. Outside the car refinish sector, this highly versatile spray gun is also becoming increasingly popular for modern application processes in the art and mural painting industries.

Second-to-none precision with HVLP technology

This material saving HVLP low pressure gun is characterized by its perfect atomization and high flexibility concerning spraying parameters. When used with a dynamic inlet pressure of maximum 29 psi, the SATAmijet 3000 B HVLP mini art complies with the strictest VOC regulations worldwide in terms of transfer efficiency rates. Dependant on the material being sprayed, it allows to achieve material transfer rates considerably above 65% even with pressure settings exceeding 29 psi.

Optimum ergonomics

The round/flat fan control can be regulated from both sides which allows single-hand operation for both right and left handed painters. Its light weight of only 11.29 ounces ensures perfect gun control. The trigger can be operated with either one or two fingers, according to personal preference.

**SATAmijet 3000 B HVLP
Mini Art**
Nozzle Size **1.2 SR**
Part No. **227967**

Useful accessories

Plug-on cup kit consisting of five glass pots, plug-in lids and blank lids ensures easy preparation, change and storage of paint material.

SATAjet 20 B - The Unique Art brush Gun

- Versatile in application - ensuring perfect finishes
- Special gun design with perfect ergonomics for imaginative painters
- Flexible air supply
- Large available range of round spray nozzles

The SATAjet 20 B has been designed for use in all areas of creative painting:
For all kinds of art brush applications including graphic design, automotive custom painting, model making, artwork and calligraphy - the results are simply outstanding.

A new way of airbrushing:

- Ergonomically shaped gun body similar to conventional guns which allows working without fatigue
- Flexible air supply - inlet connection available at the base and at the rear of the gun.
- Can be used with gravity flow cup or practical plug-in cups
- Simultaneous air and material control via the trigger for a familiar action
- Material flow control
- Low maintenance due to self-adjusting seals
- Large range of precision nozzle set-ups for ultimate detailing available

The SATAgraph 4 series

Mickey Harris

photo by Laura Harris

The SATAgraph 4 has the best of everything. Durability, comfort, dependable and affordable. In my opinion the SATAgraph 4 is the best all around airbrush ever made.

*German engineered, American made. **BAM!!!***

~Mickey Harris

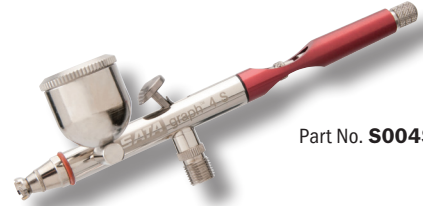

- SATA super grip trigger. Has a unique forward cut trigger with cross teeth giving a comfortable none slip grip.
- Crosscut reversible air cap tip. Crosscuts allow air to flow away from tip when close to surface, painting with less turbulence than standard tip. The nozzle shield is completely reversible so you can paint with the needle exposed to pick away tip dry just like the pros. Also prevents losing the tip when removed as happens to other brands.
- Teflon coated trigger and rocker arm. This creates a super smooth trigger pull for better control.
- Single piece trigger. No more going blind trying to put the trigger in the gun. More durable and less costly.
- Trigger set knob at rear of the gun allows you to set the trigger pull at a certain position to control paint flow.
- Solvent proof "O" rings on front and inside of airbrush.
- Very affordable replacement tips and needles.
- Competitively priced. The most affordable airbrush of this quality.
- Most importantly the SATA graph 4 is "German Engineered, Made in America".

The SATAgraph 4 is available through any authorized online or fixed store SATA distributor.

DanAm® "Mini Muscle" air compressor

Part No. 677600

The New Dan-Am mini compressor is a rugged and compact portable unit that is ideal for the airbrush artist.

The super quiet 1/6 HP motor powers the twin piston oil-less pump which delivers 1.5 CFM at a maximum pressure of 78 PSI. A regulator with gauge and moisture trap is attached for precise adjustment and clean compressed air. 120 volt with an auto shutoff feature and a nearly 1 gallon storage tank which lessens heat-related moisture build-up, reduces running time, and minimizes motor wear, results in no air pulsation at the spray gun.

Technical Details					
Length	17"	44 cm	Max. Pressure	78 PSI	5.5 BAR
Width	6"	16 cm	Storage Tank	.92 Gal.	3.5 L
Height	12½"	32 cm	Power Rating	120 Volt	
Weight	17½ lb	8 kg		125 W	
Air Flow	1.48cfm	42 l/m		1/6 HP	

DanAm® Handy Stand

Dan-Am Handy paint stand

Flexibility/Versatility

- Pivoting Multi-Directional Part Positioning
 - Adjustable to nearly 360 degrees horizontal and vertical
 - Maximizing efficiency and work flow
- Set up in a few seconds
- Adjustable during use, entire process can be done with object on stand
- Can be used for smaller parts as well as fender, tanks and helmets
- Locking casters so Handy Stand will not move during use
- Rubber tipped adjustment rods are removable for full access during painting and polishing
- Tripod base folds up for storage or easy maneuvering through doors

- Bodywork
- Sanding
- Priming
- Painting
- Polishing
